

Submersible Water Feature Pump Series

Little Giant® offers Water Feature Pumps to exacting specifications for optimum efficiency and long life. Constructed with stainless steel, cast iron and durable thermoplastic, each pump meets the rigorous demands of the most impressive water features. The stainless steel cylinder houses a powerful PSC motor, ranging from 1/5 to 1 horsepower and the direct-drive system produces greater starting torque for nearly instantaneous flow. There are five different sizes to match virtually any application. Recommended for Koi and Goldfish ponds as well as features without fish, and for use in conjunction with Little Giant skimmers and biological waterfall filters for a complete, ecologically balanced system.

Features/Benefits:

Submersible Water Feature Pump

Ideal for powering water features and pond filtration systems with flows from 2,300 GPH to 6,400 GPH

Heavy-Duty, Stainless Steel Motor Housing

To assist in cooling motor to extend the life of the pump

Clog-Resistant Design

Capable of passing 1" diameter solids

Continuous Duty Rated

For operating in the most rigorous of feature applications

Energy Efficient PSC Motor

Producing only 320 to 1210 Watts

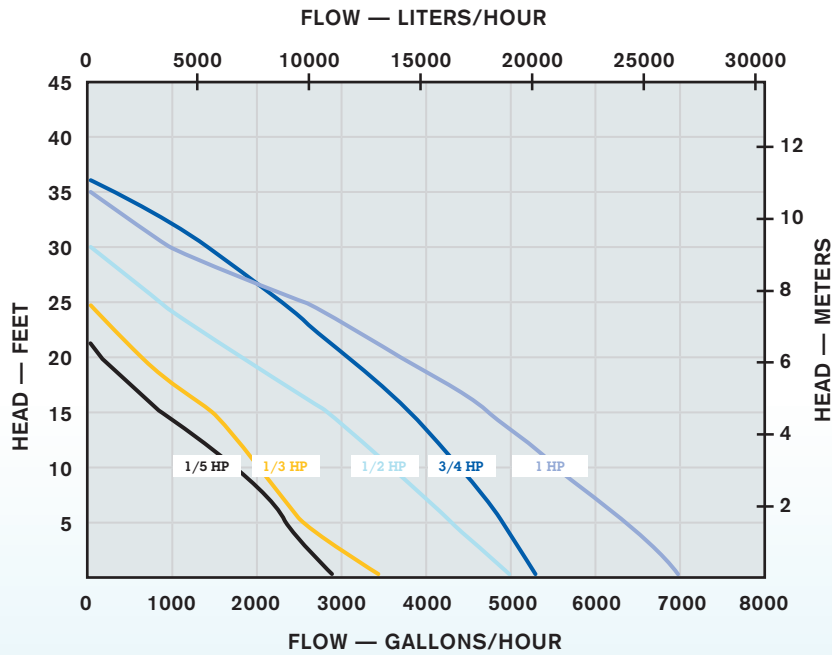

Professional-Grade Sealing

Double Mechanical and Single Radial-Lip Shaft Seals on 1/2 HP, 3/4 HP and 1 HP models. Single Mechanical and Single Radial-Lip on 1/5 and 1/3 HP model.
